

# What goes around (T+M: Dimi)

1.Verse      We were coming from the mountains  
The air was kind of cold  
We were leaving our house by the little creek  
We flew into nowhere  
A place to let all go  
A silent treasure in the sun

Ending up on the west coast  
In a villa by the sea  
Living like kings and queens  
We were moving through the south  
Made our way up to the east  
For sure there was some more for us to see

Chorus      And you looked into my eyes  
And you said to my surprise  
It's time to leave let us go  
We were heading out to somewhere  
Places we don't know  
Many happy faces we have found  
What goes around will always come around

2. Verse      The rain was pouring hard  
But it didn't change a thing  
'cause Hugo had a smile on his face  
We were cruisin' we were chillin'  
We didn't have a plan  
Even though my ears were hurting in the end

We surfed away the hours  
Found our middle once again  
Yeah Nimal made us see and understand  
The days turned quickly shorter  
We knew our time had come  
We had to leave an island in the sun

Chorus      And I looked into your eyes  
And I said to your surprise  
It's time to leave let us go  
We were flying back to the mountains  
To our house by the little creek  
Many happy faces we have found  
What goes around will always come around
